Ergonomic left-handed mouse in 45° design for relief of the wrist

Because the mouse is tilted at 45°, you do not need to place your hand completely flat on the CHERRY MW 4500. This results in a more natural hand position, which allows you to work without fatigue and with fewer problems with your wrist and tendons. This means repetitive strain injury can be avoided, or alleviated if you already have the symptoms. The click function of the right and left mouse button can be toggled at the touch of a button – without changing the system settings. The resolution can be adjusted with a button in 3 levels up to 1200 dpi for precise navigation and perfect adaptation to your preferences. Two additional thumb buttons allow you to jump to the next page or previous page in your Internet browser by touching a button. The extra small nano receiver can remain in your laptop without problems, or will find space on the bottom of the mouse. An all-rounder for the office or for home use!
